Hello, I'm
Colt Pini.

I design and develop web applications and have been for over 18 years with 7 years management experience. I love JS and the open web stack. I have led teams of designers, FE and BE developers in building small and large products that support over 130 languages and millions of users.

Software Engineering Manager / Design Engineering Manager
Indeed / 2022-2025

- Supported 35 teams at indeed for UI systems, A11Y support, Product development and strategic planning.

- Lead teams of front end and back end developers to identify and deliver products with the greatest impact to Indeed for internal to direct customer experience.

- Elevated the FE discipline at Indeed through training, integrating systems and providing scripts for integrations, developing component systems and sharing platforms.

Front-end Architect / Lead / Engineering Manager
Otus / 2020-2022

- Lead the front-end discipline by creating systems, solutions, architectures and best practices for long term business goals.

- Supported user needs through identifying and building modules for the learning management system through my BE and FE teams.

- Reduced maintenance and support costs through updating code to enterprise quality and introducing code monitoring systems and elevating the development discipline through teaching and training and automated systems.

Founder
Luce Studio / 2019–2020

- Operated a development firm where I architected FE system and supported client product development.

Lead Front-end Developer / Architect
Orvis / 2018–2019

- Architected a new CMS and e-commerce FE improving code reuse and site speed over 950%.

Sr. Front-end Developer
GitHub / 2017–2018

- Oversaw the front end for the Pull Request process working with an international team with rapid development.

Web Development Manager / Principle Ux Designer
The Church of Jesus Christ of Latter-day Saints / 2011–2017

- Designed and built products and design & component systems to support large scale enterprise systems.

DEVELOPMENT
